# TO ENSURE YOUR COPY PLEASE BRING THIS ONE ON SALE DAY

**DIRECTIONS:** The Rennylea Angus sale is held at the Culcairn property, “Ellerslie Park” located one kilometre south of Culcairn on the Olympic Highway. Please turn west onto the Cummings road and enter the property through the open double gates. Culcairn is located 29 kilometres west of Holbrook and 49 kilometres north of Albury. The address is 2741 Olympic Way Culcairn for GPS mapping programmes.

**REFRESHMENTS:** The sale refreshments are catered for by the St. Josephs Primary School, Culcairn. Please give generously to the school. this is a major fundraising opportunity for the year. Minimum charge is \$15 for morning tea and lunch. Rennylea provides the scotch fillet and rolls for the lunches.

**INSPECTION:** : The bulls will be available for inspection at any time by appointment. Please contact **Bryan (0429 038993)**, **Ruth (0400 302629)**, **Anthony (0437 043443)** or **Claire (0459 038993)** to arrange a suitable time. The bulls will be penned by 9.00am on sale day.

**ANIMAL HEALTH & WELFARE CERTIFICATION:** The bulls have received regular 7-in-1 vaccinations over their lifetime. They are vaccinated against vibriosis (2x). The bulls tested negative for persistently infected pestivirus BVDV and vaccinated against pestivirus. Rennylea Angus is JBAS8 under the industry approved Biosecurity plan. The bulls carry 3 forms of identification, they are tagged at birth with both a management and a NLIS tag, and freeze branded at 12 months of age. Their full health history is included in the buyer's sale folder, along with comprehensive notes written by the Holbrook Veterinarian Dr. Reon Holmes.

**ENTRY INTO WA:** Rennylea has carried out a Johnes Disease Herd Sample Faecal Test to enable entry into WA. Bulls then require an import permit.

**DELIVERY:** “Our bulls on Your Property”. Rennylea organizes free delivery, throughout NSW, Qld, Vic and SA following the sale. Rennylea pays 50% of the delivery to WA. These arrangements may be in conjunction with other bull sales held in the area. In some cases, delivery may require additional transport from a central point to your property.

**LOOKING AFTER YOUNG BULLS:** On pages 7 & 8 we set out your obligations for caring for young bulls when you take them home, compiled with the advice of Dr. Reon Holmes BVSc. The working life of young bulls will be extended by following these recommendations. Our Guarantee has been updated.

**SALE BY VIDEO AUCTION & INTERFACED WITH AUCTIONS PLUS:** The sale shed is in close proximity to the bull pens. The auctioneer sells the bulls by auction, with an electronic video for each bull projected onto the screen. The purchaser & price of the previous lot is displayed on two TV screens.

**PLEASE NOTE:** The bulls in this catalogue have never been handled with horses. We recommend that the new bulls are moved on their own by motorbike, as that is what they are used to. We also recommend that if you use horses, that you move your new bull with other non-cycling cattle, so that they are not spooked by the new situation. Gradually introduce the movement of bulls with horses, so they can adapt in their own time.

# RENNYLEA ANGUS AUTUMN SALE

## TUESDAY 12th March, 2024

“Ellerslie Park”, Culcairn NSW  
Sale commences at **NOON**

**Auctioneers: Andrew Wishart 0407 424 706 & Peter Godbolt 0457 591 929**

**145 Angus bulls**

**View the videos of the bulls at [www.rennylea.com.au](http://www.rennylea.com.au)**

HBR & APR registered with the Angus Society of Australia  
JBAS8 – eligible for all states

Fertility assessed by veterinarians from the Holbrook Veterinary Centre  
Structurally assessed and scanned by Liam Cardile  
All bulls have had their semen crush side tested

**Bulls will be penned & available for inspection from 9am**

**SALE TERMS:** All lots will be governed by the usual sale conditions, available on sale day. A 3% rebate is offered to outside agents introducing buyers prior to sale day. To qualify for this rebate they must do two things.

- i. Introduce the client in writing to the vendor (via email: [rennylea@bigpond.com](mailto:rennylea@bigpond.com)) prior to the sale.
- ii. Settle within 7 days.

Agents not meeting the above terms will be entitled to a 1% rebate

**AUCTIONS PLUS & PHONE BIDDING:** Please contact the Albury office of Paul & Scollard Nutrien (02 6025 1677) to arrange phone bidding, 24 hours prior to the sale or one of the agents listed above.

**Sale Catalogue Disclaimer:** All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

Dear Cattle Breeder,

It is with great pleasure that we present our Autumn sale catalogue for 2024. We have catalogued 145 18 month old bulls that were born in the spring of 2022. The bulls are being filmed on the 16th and 17th of January. The video clips of these bulls will be hosted on our website [www.rennylea.com.au](http://www.rennylea.com.au) by the time you receive this catalogue.

To kick off the sale there are 33 bulls that were used in our own back up joining as yearlings in late 2023. They have worked hard and may be in lighter condition than other bulls. These bulls were carefully selected by our team to use from a group of 700 bulls. They have been selected on performance, structure, temperament and phenotype. They have successfully backed up heifers and mature cows for two cycles following one AI. They have all passed a vet check, semen test and a service test following working. A larger group of their mates will be available as two year olds in the spring auction.

The sale is once again interfaced with Auctions Plus and videos and full sorting functions available on the Rennylea, Auctions Plus and Angus Australia websites prior to the sale. Please make sure you register with Auctions Plus prior to the sale.

There are 18 sons of Moogenilla Q33 on offer. These bulls have performed well in their contemporary groups exhibiting thickness, muscle and offering market flexibility. There is also 18 sons of Landfall New Ground Q6, a bull we purchased in partnership who has bred moderate framed and sound footed progeny. There are 14 sons of Te Mania Qrusade Q1454, a Kirby son we own in partnership. He is the fifth highest IMF sire on the Angus database at +8.2. Rennylea Q1077 is a bull with a unique data profile in the industry, he's over 15 for EMA and +5.5 for IMF, and combines this with good feet, docility and phenotype. There are 7 sons in this sale and we plan to use more of him.

The 145 bulls average +4.3 for marbling which is the top 10% of the angus breed and 10 for EMA which is top 15% of the breed. All bulls average in the top 9% for the Angus Breeding Index and top 8% for the Heavy Grain Index. There is consistency in meeting the Rennylea breeding objective throughout the catalogue. Our commitment to breeding bulls for the commercial beef industry, which improve profitability on farm and offer market flexibility and access to premiums in the supply chain remains. Our cows are all run under commercial conditions and joined in 6 weeks with no second chances.

We have done everything possible to ensure the bulls perform to their description and achieve great results with your cows. Please contact Bryan (0429 038 993), Ruth (0400 302 629), Anthony (0437 043 443) or Claire Scott (0459 038993) at any time to discuss your bull requirements.

Thank you for your interest and support,

*Bryan, Lucinda, Ruth & Anthony Corrigan*

## RENNYLEA BREEDING OBJECTIVES

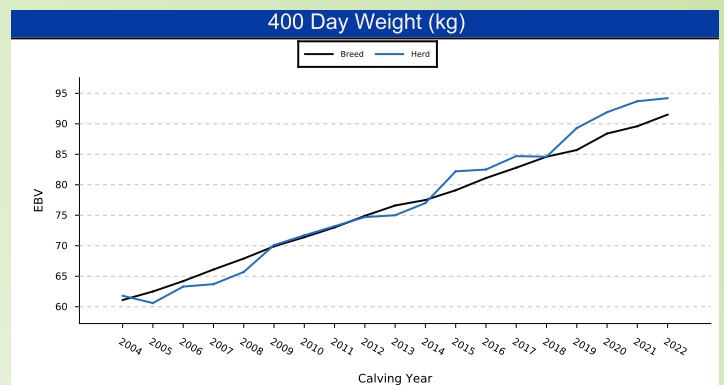

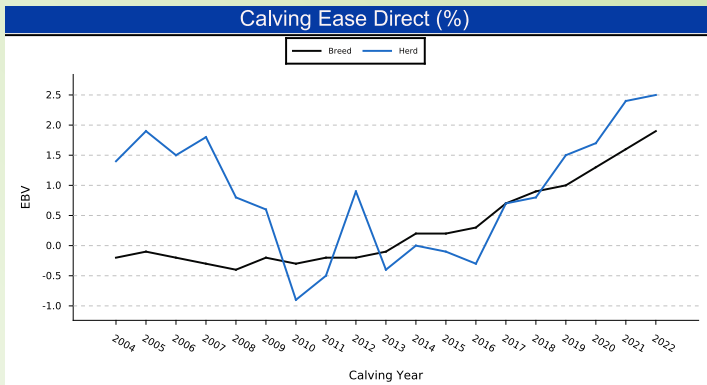

Watch this short video, "Creating an Efficient Cow Herd" @ [www.rennylea.com.au](http://www.rennylea.com.au) which gives a fantastic explanation of the Rennylea Breeding Philosophy.

Rennylea has a clear breeding goal with a commitment to lower cost of production and increase net profit. We have done this by maximising the 'free traits' of fertility, structure, temperament and carcase and balancing the 'cost traits' of milk, growth and yield. In the latest Genetic Benchmarking Report 1727 dams average in the lowest 1/3 of the breed for birthweight, top 42% for 400 day growth, top 17% for EMA, top 10% for IMF% and top 20% for \$A and \$Gn indexes.

In summary:

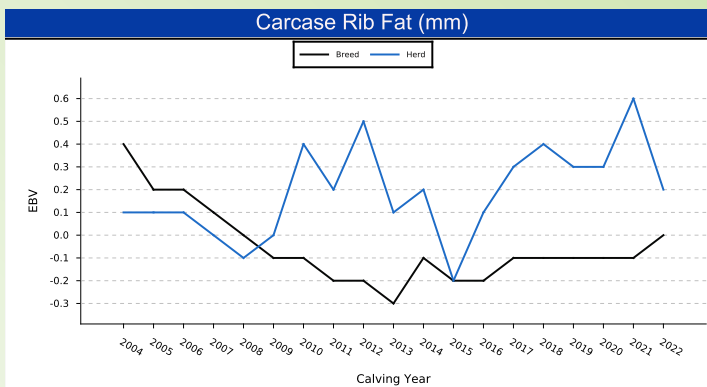

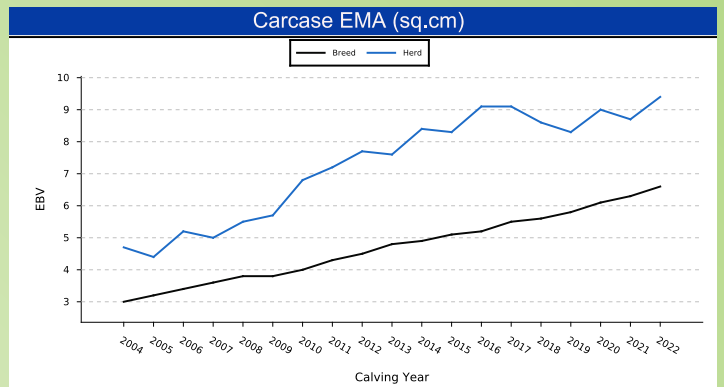

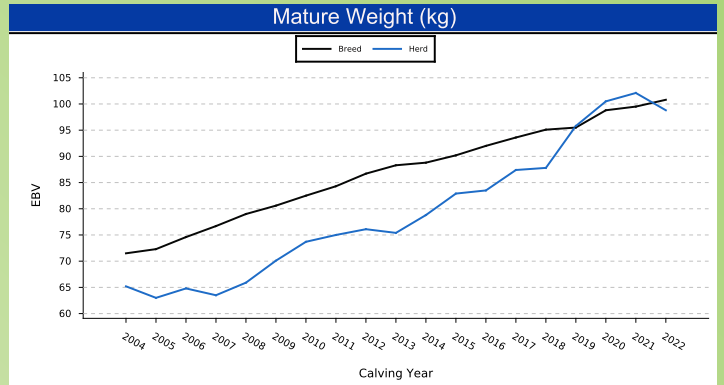

- i. Rennylea is committed first and foremost to fertility, short calvings over six weeks, profitable and functional cattle
- ii. Moderate maturity pattern and positive fat
- iii. Fast growth to 400 days
- iv. Emphasis on meat quality and muscling, essential for the value chain. All cows average in the top 10% for the IMF trait in the breed (all dams including recipients)
- v. Market flexibility, grain and grass
- vi. The importance of an efficient cow herd throughout the year as feed quality & quantity varies

## GENETIC PROGRESS IN THE RENNYLEA HERD – all calves born every year, compared with breed trends

# GENETIC PROGRESS IN THE RENNYLEA HERD

– all calves born every year, compared with breed trends

## GENETIC PROGRESS IN THE RENNYLEA HERD

– all calves born every year, compared with breed trends

These are average EBVs for the following groups of sale bulls and retained females, demonstrating the Rennylea breeding objective.

EBV Averages																			
	Calving Ease				Growth & Maternal					Fertility		Carcase					Temp	Index Values	
Jan 24 Breedplan	Dir	Dtrs	GL	Bwt	200	400	600	Mwt	Milk	SS	DC	Cwt	EMA	Rib	Rmp	IMF	DOC	\$A	\$GN
Sale Bulls x 145	1.9	4.6	-4.8	3.9	54	100	130	105	19	2.5	-5.5	76	10	-0.2	-0.8	4.3	23	249	333
All Herd Cows x 1539	1.8	3.4	-4.5	3.5	49	90	117	95	18	2.1	-5.5	67	8.8	0.4	-0.2	3.7	18	226	299
T Retained Heifers x 592	2.7	4.6	-5.1	3.4	51	96	124	98	19	2.2	-5.7	72	10.1	0	-0.5	4.3	22	249	332

As performance increases, our breeding challenge is to maintain high fertility and optimise the balance between maturity pattern, fat, muscle and meat quality.

Our herd profile reflects our long term commitment to creating a sustainable cow herd with elite meat quality.

Bryan and Ruth Corrigan March, 2024

### SEMEN INTERESTS ON RENNYLEA ANGUS BULLS

- i. The bulls are sold with full physical ownership by the purchaser and the right to the salvage value of the bull. Purchasers have the right to collect and use semen within their own herd at their expense. The buyer may not dispose of, or advertise the sale or disposal of semen rights from any Rennylea bull to any other party.
- ii. Rennylea is maintaining the full semen marketing rights and 50% of future semen sales to industry. If the right to collect and jointly market semen is exercised, costs and proceeds will be shared between Rennylea and the owner.
- iii. For semen used in the Rennylea herd, collection costs will be at Rennylea's expense and at a convenient time and place for the owner of the bull. Rennylea is entitled to use as much semen as required in their breeding program.
- iv. If a bull is sold on at a later date, these conditions carry forward with the bull.
- v. The physical transfer of bulls from Rennylea to the buyer recognises the above rights to the semen interests. It is the responsibility of the buyer to ensure that any successor in title to the buyer and any person to whom the buyer passes possession of the bull will be liable jointly and individually for the reasonable expenses of Rennylea under these terms.
- vi. There may be some bulls for whom Rennylea will sell the semen marketing rights to the new owners. Please contact Rennylea Directors to discuss future semen rights, prior to purchase.

Please contact Ruth Corrigan on 0400 302 629 or [semensales@rennylea.com.au](mailto:semensales@rennylea.com.au) for further information. If you wish to negotiate regarding semen interests please contact us prior to the sale.

## WHAT YOU SHOULD DO WHEN YOUR NEW BULL ARRIVES AT YOUR PLACE

### 1. UPON ARRIVAL

- i. Ensure your new bulls socialises with a group of animals, (anything except other bulls) in the yards, when they arrive.
- ii. Run the new bulls with a small group of empty females, (he has come from a different herd and may not have had exposure to some of the normal pathogens present in your herd). **This must be done, only two new bulls at a time, with the empty females, for a period of 2 to 4 weeks. Ideally give the cows prostaglandin every 2 weeks so they continue to cycle.**

### 2. PRE JOINING

- i. We recommend a breeding soundness examination(BSE), including structural assessment, testicular palpation and (ideally) a service ability test. This is mandatory for second joining and older bulls each year. It will improve the fertility performance of the herd, by removing non working bulls out with the cows. If bulls are not service tested it is essential you observe the bulls serve in the first week of joining.
- ii. **Keep vaccinations up to date, vibriovax, pestivirus and leptospirosis 7 in 1 and an annual drench, 4-6 weeks prior to joining.**

### 3. JOINING – new bulls have the highest risk of breakdown in the herd, this risk can be reduced by:

- a. **PROTECT** a new bull by not overjoining, 40 females per bull maximum.
- b. **It is recommended, if single sire joining with a new bull, to rotate him with a proven bull for at least one cycle. Also, it is good practice to rotate proven bulls for the last cycle with all new bulls.**
- c. **Recommend that all females are joined in groups with 2 bulls.**

**“Most new bull fertility issues develop during the joining period, rather than being pre existing problems, this means that bull surveillance during the joining period is essential”**

#### **ONCE THE JOINING IS SET UP, MONITORING IS ESSENTIAL TO IDENTIFY ISSUES AS THEY DEVELOP**

Your new bulls need to be run in mobs that are easily monitored, check them 2 to 3 times a week for the first three weeks and then weekly thereafter. This includes looking for,

- a. the bull serving, (this has not been successful until the bull thrusts). If bulls are continually mounting without serving it is often a sign the bull has developed a penile infection and needs to be rested and replaced immediately.
- b. lameness,
- c. evidence of penile or prepuce swelling or inflammation
- d. signs of ill health, lethargy, etc.
- e. numbers of females cycling, (for every 21 females, one cycles each day at the commencement of joining).  
After three weeks of joining, there will be one cow cycling every three days in 21 females.

### 4. POST JOINING – Annual breeding soundness evaluation is a non negotiable procedure. Good management of bulls is a year round procedure.

Bulls need to be removed from the cows, at the same time, to create their new mobs. This will limit the amount of potential injuries by reducing the number of bull interactions.

Bull paddock management is very important to minimize injury between joinings. The bulls need enough room to reduce fighting, restricted feed and water will increase interaction.

The target between joining is to restrict weight gain in older bulls to prevent breakdowns. Ideally young bulls have access to a higher level of nutrition as they continue to grow.

Early pregnancy testing is essential for good female management and detection of surprises. The earlier the pregnancy testing is undertaken, the more likely the cause of the problem will be identified. This will not only give you early notice of the problem but also help in formulating a plan to help reduce the chance of the problem occurring in the future.

**Reon Holmes BVSC**

## RENNYLEA BULL GUARANTEE

There is no more important time for a commercial business than pregnancy testing. Our aim is for you to have PTIC females in a tight calving pattern. To achieve a high pregnancy you need to follow the recommendations on the previous page.

The bulls offered have passed an independent and rigorous test for:

- i. **STRUCTURAL SOUNDNESS** – bulls have been structurally assessed and those that don't meet our standards are culled. This is carried out by Beef Excel
- ii. **REPRODUCTIVE SOUNDNESS** - Veterinarians from the Holbrook Veterinary Centre have examined the bulls for their reproductive soundness, their penis checked and checked for warts. Their testicles are measured regularly and palpated to check they are fit to breed.
- iii. **CRUSH SIDE SEMEN TEST**- has been carried out on every bull by vets from the Holbrook Veterinary Centre. Those that have not passed were removed from the catalogue.

These tests identify and removes the bulls in every drop that are unfit to be mated. Note that these results are valid for the next mating only and annual testing is strongly recommended.

### WHAT DOES RENNYLEA GUARANTEE?

#### 1. YEAR ONE

If for any reason, a tested **RENNYLEA** bull is unable to sire calves as a result of a failure of his **own fertility** during his first mating we will either:

- replace him with an equivalent Bull
- give credit towards future purchases, **under a private treaty negotiation**
- refund the purchase price of the bull
- to claim this guarantee you must follow the procedures on the previous page and submit a report from a veterinarian approved by Rennylea
- we recommend that you insure the bulls for the first 6 months

#### 2. YEAR TWO from the date of purchase

- We will refund the purchase price if the bull's structure is not satisfactory
- We do not replace bulls on the basis of broken penis or other misadventures and strongly recommend you insure the bull for the first joining

**We take our obligation to you seriously and do our utmost to produce bulls that add value to your operation through the depth and accuracy of their genetics, the pre sale screening, the provision of full animal health records on sale day and careful delivery to your property.**

**However, we do not manage your joining. This guarantee does not replace your obligation to follow the recommendations on page 6, and to observe and manage bulls during joining and future years.**

## ESTIMATED BREEDING VALUES AND \$INDEX VALUES

**IMPORTANT:** Note that all bulls have been measured for both their phenotype (weights, scans, days, docility etc) and genotype (HD50K test which records their DNA). The investment in DNA testing adds considerably to the accuracy of the Estimated Breeding Values at a young age.

**Accuracies:** Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, its siblings, relations or progeny, then the accuracy of the EBV for a particular trait will increase. The accuracy also indicates the potential for change in values over time. Accuracies are influenced by the heritabilities of the traits and the genetic associations existing between them. Genomics throughout the Rennylea pedigrees has added significantly to the accuracy of young bulls.

**Lowly heritable traits** (less than 20%) include: fertility traits such as days to calving and calving ease, and milk.

**Medium heritable traits** (20% to 35%) include gestation length, eye muscle area, 200 and 400 day weight, and rump fat.

**Highly heritable traits** (over 35%) include rib fat, scrotal size, 600D weight, mature cow weight, birthweight, marbling and retail beef yield.

### 1. CALVING EASE

**Calving Ease DIR (%)**: Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to calve without assistance. Heritability of calving ease traits is 10% and positive values are desirable.

**Calving Ease DTRS(%)**: Estimate of the genetic differences between animals in the ability of their two year old daughters to calve without assistance. Positive values are desirable.

### 2. BIRTH

**Gestation Length (days)**: Estimation of the genetic differences between animals in the number of days from the conception to the birth of a calf. A negative value is desirable. Heritability of GL is 65%, the correlation with calving ease is -.27% & BW -.5.

**Birthweight (kg)**: Estimates of the genetic differences between animals in calf birth weight. Small or moderate birthweight EBVs are considered desirable. The heritability of birthweight is 39%.

### 3. GROWTH

**200 Day Milk(kg)**: An estimate of the genetic differences among animals in milk production potential, expressed in calf growth performance. The heritability of the milk trait is 10%.

**200 Day Growth(kg)**: Estimate of the genetic differences among animals in weight at 200 days.

**400 Day Growth(kg)**: Estimate of the genetic differences among animals in weight at 400 days.

8.

**600 Day Growth(kg)**: Estimate of the genetic differences among animals in weight at 600 days. Heritability of the growth trait increases with age, 12%, 23% and 35% at 200, 400 and 600 days. Mature cow weight is the most heritable at 40%.

Optimum growth is balanced with the production environment. Note that the higher the growth figure at 600 days, then the animal will be bigger, a higher bodyweight, and a later maturity pattern.

### 4. CARCASE

The Rennylea herd has been independently scanned for eye muscle area & fat cover since 1990 and for marbling since the mid 1990s.

**Carcase Weight(kg)**: An estimate of the genetic difference among animals in hot standard carcass weight at 650 days of age. The heritability of carcass weight is 42%.

**Eye Muscle Area(cm<sup>2</sup>)**: These estimate breeding values of the genetic differences among animals in eye muscle area at the 12/13th rib site on a 300kg carcass. The heritability of EMA is 20%.

**Rib Fat(mm)**: An estimate of the genetic differences in fat depth at the 12/13th rib site on a standard 300kg carcass. Significantly negative values are not desirable for either fat ebv. Heritability is 45%.

**Rump Fat(mm)**: An estimate of the genetic differences in fat depth at the 8th rib site on a standard 300kg carcass. Heritability is 32%.

**Intramuscular Fat(%)**: An estimate of the genetic differences in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcass. Heritability of IMF% is 37%.

### 5. FERTILITY

**Mature Cow Weight(kg)**: Estimate of the genetic differences in cow weight at 5 years of age. Rennylea believes this is a key fertility EBV and optimum mature cow weight is as close as possible to the 400 weight. Heritability of MCW is 40%, it is the most heritable growth trait & the least recorded.

As described rib and rump fat are heritable. Slightly positive genetic fat cover is important and combined with mature cow weight are useful predictors of the herd fertility profile under a commercial production system.

**Days to Calving(days)**: This ebv is an indicator of female fertility based on time between the cow's first exposure to a bull and when she subsequently calves. This ebv has the lowest heritability of all the researched traits at 7%, thus

has low accuracy, and is not a key performance indicator for maintaining or improving herd fertility.

**Scrotal Size(cm):** These are estimates of the genetic differences among animals in scrotal circumference at 400 days. The trait is highly heritable at 39%. Positive values are favourable.

## 6. SELECTION INDICIES

Dollar index values have been developed to combine the important ebvs for different markets, into a single value. They are another piece of information that may be used when selecting bulls to target particular markets, and ranking them for that purpose. We take the most notice of the Angus Breeding Index and the heavy grain index.

## FERTILITY TESTING

Veterinarians from the Holbrook Veterinary Centre assess the bulls for breeding soundness, prior to cataloguing. Any purchasers who require a certificate of fertility may request this on sale day, or within a month of the sale.

## STRUCTURAL ASSESSMENT

The structural evaluation and scanning for carcass traits has been done by Liam Cardile.

## INTEGRITY OF DATA

**PHENOTYPES:** Every trait published on Rennylea bulls are backed up by the bull's own performance data, collected and transferred electronically to Breedplan. At each collection point recommended by Breedplan, data is collected on all cattle in the herd, except when they have been sold. Sue Govan manages the data and recording system.

**GENOTYPES:** Rennylea genotypes every animal in the herd at birth, as part of our commitment to ensuring maximum accuracy for selection at a young age. This includes all bulls and heifers.

# REPORTING OF RECESSIVE GENETIC GENES

In this Rennylea catalogue, bulls that have a probability of carrying the recessive genes AM, NH and DD have been tested and identified (probability > 10%). We have taken the step of adding this information to the animal's description. We do not consider these conditions to be a significant commercial issue, any clients who wish to discuss further please contact one of the Rennylea team.

The following nomenclature identifies the status of the bulls in the catalogue.

**AMF** Tested AM free

**AMFU** Based on pedigree AM free. Animal has not been tested

**AM%** \_% probability the animal is an AM carrier

**AMC** Tested AM-Carrier

For NH or DD simply replace AM

**Sire Rennylea NOR P987 has 4 sons in the catalogue**

**Sire Rennylea NOR Q1077 has 7 sons in the catalogue**

# BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The Beef Class Structural Assessment System was designed by the Beef Improvement Association and breed societies, and funded by Meat & Livestock Australia to enable selection to improve structural soundness.

Rennylea uses a strict assessment program to assess the structural composition of their herd to best guarantee the soundness of their stock, the cow herd is assessed by Ruth and Bryan, and Sale bulls are independently assessed by Beefxcel.

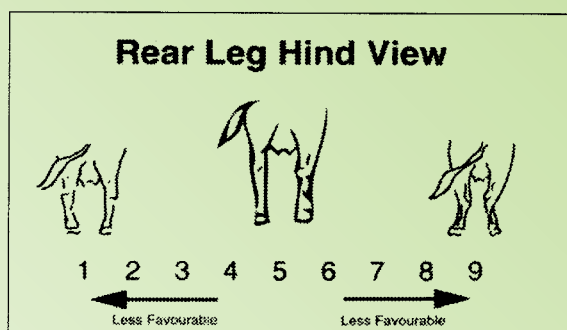

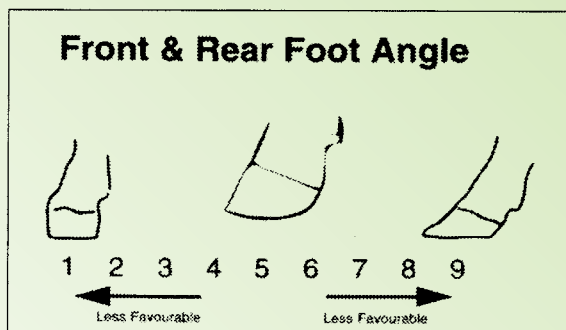

## An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure;

- A score of 5 is ideal;
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing;
- A score of 1 or 9 should not be catalogued and are considered immediate culls.

## TEMPERAMENT

The temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet (touchable) score '1'. Animals that are aggressive or extremely agitated in the crush are scored as '5'.

**FOR MORE INFORMATION PLEASE CONTACT:

NOTES: **Used as a yearling spring 2023 joining.** For the first time we have selected a run of yearling bulls which have been used in the recent spring joining, we have kept some aside to sell through the spring auction. These young bulls have passed their vet check and a service test since working and been managed as a group since coming out of cows at the end of 2023. T69 is a moderate framed, well muscled and docile Q33 son out of an L519 heifer. Top 5% IMF and \$GN.

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

# NOTES

**The bulls in this catalogue were filmed for the web based clips on the 16th and 17th January 2024. Their performance data is also available with the video clips. To view these please go to [www.rennylea.com.au](http://www.rennylea.com.au) and follow the link to where the video clips are hosted. You will be aware that mail deliveries are becoming less reliable. It may take up to 4 weeks for some distant clients to receive their catalogues. Bear with us!**

RR

# RENNYLEA QUALITY ASSURANCE

The bulls in this catalogue have been measured for every trait at every required point. They are meticulously recorded by Sue Govan and their data have the highest accuracy for their age.

## Every bull in the catalogue has been:

- ✓ Weighed and tagged at birth
- ✓ Weighed at 200, 400 & 600 days in large management groups
- ✓ All mature cows in the herd are weighed for mature cow weight, & condition scored every year
- ✓ Calving ease and gestation length data submitted
- ✓ Scanned for eye muscle area, intramuscular fat and fat depth at the rib and rump sites (400 days), testicles measured
- ✓ Parent verified through HD50K test
- ✓ Those with known recessive gene frequency tested
- ✓ HD50K tested at birth for production traits, and incorporated into their EBVs through the single step analysis
- ✓ Before sale they have been independently assessed for feet, legs, sheath, testicles and docility. These data and the Breedplan structural EBVs are available
- ✓ Before sale they have been independently assessed for fertility by veterinarians from the Holbrook Veterinary Centre
- ✓ Rennylea is a JBAS8 herd and bulls are eligible for entry to all states
- ✓ Tested negative for persistently infected pestivirus, BVDV, & vaccinated
- ✓ Vaccinated for 7-in-1 and vibriosis and sold with a lifetime animal health record
- ✓ They carry 3 forms of ID, management, NLIS & freeze branded
- ✓ They are **delivered free** to NSW, VIC, SA, Qld to major centres, in conjunction with other bull sales
- ✓ Our product is guaranteed see the guidelines in the catalogue
